$0.99 - Offers In-App Purchases

Leave anyone a VoiceMail without speaking to them!

WhatCall helps you avoid returning or making a call when you don’t really want to speak to someone, but gives you the excuse and proof that you tried.

Simply dial with WhatCall and the person you dial will receive an instant missed call from your number, while you are directed straight to their voicemail without ringing and any possibility of them answering your call.

With WhatCall they’ll even receive a missed call text message from their network if it supports that feature!

Examples of where WhatCall is useful:
- Calling in sick to work but don’t want to speak to your boss and answer lots of awkward questions.
